

## ACT NOW TO LIMIT NUCLEAR WASTE TRAFFIC ON HWY 285

Communities on Hwy 285 are on a radioactive waste route that is about to become a major shipping highway for a new form of nuclear weapons' waste. An accidental release would threaten our health and property values. **Like overdevelopment and water shortages, a radioactive release of powdered plutonium would change our quality of life irreparably.**

**This is a brief, rare moment when we can change the outcome by influencing the decision-makers. We can change this but only by speaking up NOW. This window of opportunity is short.**

**When: Sunday, Feb. 19,  
3:00-5:00 pm**

**Where: ECIA Railroad Bldg.  
1 La Hacienda Loop**

We're here to help. **The 285 Alliance** is holding a community forum where you can get everything at once:

- The facts and information
- How to influence the decision makers
- How to comment to the proper agencies accurately and effectively

We'll make this complex issue clear and understandable. You will be able to:

- Learn how this new mission will affect you,
- Create a comment and send it immediately to the correct agency,
- Send the Governor a short video message, and
- Do it all with your neighbors!
