

Theodore 'Ted' Wyka, Environmental Manager
National Nuclear Security Administration
Los Alamos Field Office
505-667-5105

Call Script:

"I'm calling about LANL's application to vent tritium that would impact nearby Pueblos and residents." Ask NNSA to:

- Require LANL to make public its list of 53 alternatives to tritium venting.
- Require LANL to rigorously comply with DOE Order 458.1 which requires LANL to maintain public exposure "as low as reasonably achievable" beneath established regulatory limits and to do the full analysis required for that.
- Require LANL to treat infants and children as members of the public and include calculations of radiation doses to them in its application to EPA.
